THE SERVICE

What Are Structural Fasteners?

Structural fasteners are manufactured from quenched and tempered steel with minimum 120 ksi tensile strength -- for steel-to-steel connections in bridges, buildings and industrial structures. Subject to strict quality verification by each client.

"From Delhi Metro tunnels to nuclear plants -- Canco structural fasteners meet the most exacting specifications in the industry."

- 01 Material Specification**
High tensile steel per client BOQ and IS/DIN/ASTM standards.
- 02 Coating Process**
PTFE, HDG, Electro Nickel or Zinc Plated to exact client specification.
- 03 Quality Testing**
Salt spray (NABL accredited), dimensional inspection, tensile testing per batch.
- 04 Client Approval**
Vendor and technical submittal submitted -- NOC or approval issued before delivery.

WHERE WE WORK

Sectors & Clients

Delivered across infrastructure, industrial and public sector projects

<p>Metro Rail DMRC -- fasteners for underground civil and electrical works</p>	<p>Power and Nuclear BHEL and NPCIL -- precision supply for plant structures</p>	<p>EPC and Construction Larsen and Toubro -- structural bolting for major projects</p>	<p>Oil and Gas Indian Oil -- refinery and pipeline infrastructure supply</p>
