

# DRYWALL SCREW

---

## ◆ Short Description (Beside Product Image)

High-performance drywall screws designed for fastening gypsum boards to metal or wooden studs. Manufactured from hardened carbon steel with sharp threads and corrosion-resistant coatings for reliable grip and durability in construction applications.

## ◆ Product Overview

Drywall screws are specifically engineered fasteners used for fixing drywall (gypsum boards) to framing systems such as light gauge steel or timber. Featuring a bugle head design and sharp point, these screws allow easy penetration and a flush finish without damaging the board surface.

Canco Fasteners manufactures drywall screws as per international standards or customer specifications, supporting OEM supply, bulk export, and distributor requirements.

## **Technical Specification Sheet**

### **Product Description**

Self-tapping screws designed for fastening drywall sheets to metal or wooden framing with high holding strength and easy installation.

### **Components / Design Features**

Bugle head for flush finish  
Sharp point for easy penetration  
Deep thread for strong grip  
Phillips drive recess

### **Manufacturing Process**

Cold heading  
Thread rolling  
Heat treatment (hardening)  
Surface coating (phosphating or zinc plating)

### **Material Grades**

Hardened Carbon Steel

### **Surface Finishes**

Black phosphate  
Grey phosphate  
Zinc plated  
Custom coatings on request

### **Dimensional Control**

Manufactured to precise tolerances in accordance with applicable standards or approved customer drawings.

### **Testing & Inspection**

Dimensional inspection  
Hardness testing

Thread inspection  
Surface coating inspection

### **Typical Applications**

Drywall installation  
Gypsum board fixing  
Interior partition systems  
False ceiling installation

### **Installation Note**

Use appropriate screwdrivers or power tools with controlled torque. Ensure correct screw type (fine or coarse thread) based on substrate for optimal performance.

### **Export & Packaging**

Loose cartons  
Box packing  
Bulk packaging  
Private-label packaging
