

EMT CLAMP WITH 1 HOLE

◆ Short Description (Beside Product Image)

Heavy-duty EMT clamp with single mounting hole designed for secure fastening of Electrical Metallic Tubing (EMT) to walls, ceilings, and structural surfaces. Manufactured from high-quality steel with corrosion-resistant finish for long-term durability.

◆ Product Overview

EMT Clamp with 1 Hole is used to secure Electrical Metallic Tubing (EMT) conduit to flat surfaces in electrical installations. The clamp features a curved saddle to firmly hold the conduit and a single elongated mounting hole for easy alignment and fastening.

Canco Fasteners manufactures EMT clamps as per industry standards or customer drawings, supporting OEM programmes, distributor supply, and bulk export requirements.

◆ Quick Specifications

Material Options

- Carbon Steel
- Stainless Steel (AISI 304)
- Stainless Steel (AISI 316)
- Other grades subject to customer specification

Surface Finish Options

- Electro-Galvanised (Zinc Plated)
- Hot-Dip Galvanised
- Pre-Galvanised
- Powder Coated (upon request)
- Custom coatings subject to specification

Size Range

Available to suit various EMT conduit sizes including ½", ¾", 1", 1¼", 1½", 2" and above. Custom dimensions available subject to drawing approval.

Mounting Type

- Single mounting hole (elongated slot)

- Designed for screw or anchor fastening

Customisation Availability

- Custom dimensions
- Material thickness variation
- Special surface treatments
- Private-label packaging
- Bulk export configurations

Technical Specification Sheet

Product Description

Formed steel clamp designed to support and secure EMT conduit in electrical wiring systems. Ensures stable routing of conduit along walls and ceilings.

Manufacturing Process

- Sheet metal stamping
- Press forming
- Hole punching
- Controlled finishing and coating

Material Grades

- Mild / Carbon Steel
- Stainless Steel 304
- Stainless Steel 316
- Other materials as specified

Surface Finishes

- Zinc plated
- Hot-dip galvanised
- Pre-galvanised
- Powder coating (optional)

Dimensional Control

Manufactured to specified dimensional tolerances in accordance with approved customer drawings or relevant electrical installation standards.

Testing & Inspection

- Dimensional inspection
- Surface finish inspection
- Thickness verification
- Material certification (EN 10204 3.1 available upon request)

Typical Applications

- Electrical conduit installations
- Commercial buildings
- Industrial wiring systems
- Infrastructure projects
- Ceiling and wall conduit routing

Installation Note

Clamp should be securely fastened using appropriate screws or anchors based on substrate material. Spacing between clamps should comply with local electrical codes.

Export & Packaging

Available in:

- Loose cartons
- Poly bag packing
- Palletised loads
- Private-label cartons
- Containerised export quantities

Canco Fasteners manufactures EMT clamps strictly to approved standards or customer drawings. Products are available for OEM programmes, distributor supply, and containerised export shipments.
