

J Type Clamp

◆ Short Description (Beside Product Image)

Heavy-duty J Type Clamp designed for secure mounting and support applications in construction, electrical, HVAC, and industrial installations. Manufactured from high-quality carbon steel with corrosion-resistant finishes to ensure durability, load-bearing capability, and long service life.

◆ Product Overview

J Type Clamps are commonly used for structural support, channel fixing, and bracket mounting in mechanical, electrical, and construction installations. The J-shaped design provides a strong and stable support point for fastening pipes, channels, brackets, or other structural components.

Canco Fasteners manufactures J Type Clamps according to international quality standards or customer drawings, supporting OEM supply, distributor networks, and bulk export requirements.

◆ Quick Specifications

Material Options

Carbon Steel

Stainless Steel (AISI 304)

Stainless Steel (AISI 316)

Other grades available upon customer request

Surface Finish Options

Electro-Galvanised (Zinc Plated)

Hot-Dip Galvanised (HDG)

Plain / Self Colour

Custom coatings available upon request

Size Range

Available in multiple dimensions and thicknesses depending on load requirement and installation type. Custom sizes and hole configurations available as per approved drawings.

Standards

Manufactured as per industry practices or customer drawing specification

Compliance documentation available upon request

Customisation Availability

Custom dimensions

Material grade modifications

Special surface coatings

Private label packaging

Bulk export packaging

◆ Technical Specification Sheet

J Type Clamp – Technical Data

Product Description

Structural support clamp used for mounting and securing components such as channels, brackets, pipes, or support frames in construction and industrial applications.

Manufacturing Process

Sheet metal cutting

Precision bending / forming

Hole punching or drilling

Surface finishing and coating

Material Grades

Mild Steel / Carbon Steel

Stainless Steel 304

Stainless Steel 316

Other materials available upon request

Surface Finishes

Zinc plated

Hot-dip galvanised

Plain finish

Custom coatings available

Dimensional Control

Manufactured under controlled tolerances in accordance with approved drawings or internal production standards.

Testing & Inspection

Dimensional inspection

Visual surface inspection

Coating thickness verification (for galvanised products)

Material certification available upon request

Typical Applications

Channel support systems

Electrical and cable tray installations

HVAC support structures

Industrial mounting and structural fixing

Construction support hardware

Export & Packaging

Loose cartons

Palletised shipments

Private-label packaging

Bulk export container loads

Canco Fasteners manufactures J Type Clamps strictly according to approved standards or customer drawings. Products are available for OEM programmes, distributor supply, and containerised export shipments.
