

L TYPE UP DOWN CLAMP

◆ Short Description (Beside Product Image)

L Type Up Down Clamp designed for secure mounting and support in construction, electrical, HVAC, and structural installations. Manufactured from high-strength steel with corrosion-resistant finishes to ensure durability, stability, and long service life in demanding environments.

◆ Product Overview

L Type Up Down Clamps are used to support, align, and fasten structural channels, panels, or mounting systems in industrial and construction applications. The stepped L-shape design allows secure fixing from both upper and lower contact points, providing reliable structural support.

Canco Fasteners manufactures L Type Up Down Clamps according to international quality standards or approved customer drawings, supporting OEM supply, distributor networks, and bulk export requirements.

◆ Quick Specifications

Material Options

Carbon Steel

Stainless Steel (AISI 304)

Stainless Steel (AISI 316)

Other grades available upon customer request

Surface Finish Options

Electro-Galvanised (Zinc Plated)

Hot-Dip Galvanised (HDG)

Plain / Self Colour

Custom coatings available upon request

Size Range

Available in multiple dimensions, thicknesses, and slot configurations depending on installation requirements. Custom sizes can be manufactured according to approved drawings or project specifications.

Standards

Manufactured as per industry practices or customer drawing specifications

Compliance documentation available upon request

Customisation Availability

Custom dimensions

Material grade modifications

Special surface coatings

Private-label packaging

Bulk export packaging

◆ Technical Specification Sheet

L Type Up Down Clamp – Technical Data

Product Description

Structural clamp designed for secure mounting and support in channel systems, construction frames, and industrial installations where both top and bottom support contact is required.

Manufacturing Process

Precision sheet metal cutting

CNC bending / forming

Slot punching or drilling

Surface finishing and protective coating

Material Grades

Mild Steel / Carbon Steel

Stainless Steel 304

Stainless Steel 316

Other materials available upon request

Surface Finishes

Zinc plated

Hot-dip galvanised

Plain finish

Custom coatings available

Dimensional Control

Manufactured under controlled dimensional tolerances according to approved drawings or internal production standards.

Testing & Inspection

Dimensional inspection

Visual surface inspection

Coating thickness verification

Material certification available upon request

Typical Applications

Channel support systems

Solar mounting structures

Electrical and cable tray installations

HVAC support systems

Industrial structural fixing

Export & Packaging

Loose cartons

Palletised shipments

Private-label packaging

Bulk export container loads

Canco Fasteners manufactures L Type Up Down Clamps strictly according to approved standards or customer drawings. Products are available for OEM programmes, distributor supply, and containerised export shipments.
