

NAIL PIPE CLAMP

Short Description

Heavy-duty Nail Pipe Clamp designed for secure and reliable fixing of pipes and conduits to concrete, brick, and solid surfaces. The clamp ensures firm grip and easy installation using nail-type fastening.

Product Overview

The Nail Pipe Clamp is a fastening solution consisting of a metal clamp with an integrated nail or pin for quick installation. It is widely used for securing electrical conduits, plumbing pipes, and cable lines. Manufactured by Canco Fasteners, it is suitable for bulk supply, OEM applications, and export markets.

Quick Specifications

Material Options:

- Carbon Steel
- Stainless Steel (AISI 304 / 316)

Surface Finish:

- Zinc Plated
- Hot-Dip Galvanised
- Plain Finish

Size Range:

Available for multiple pipe diameters (custom sizes available)

Standards:

As per industry standards or customer drawings

Customisation:

- Size & thickness
- Material grade
- Surface coating
- Packaging options

Technical Specification Sheet

Product Description:

Metal clamp with integrated nail fastening system

Components:

- Clamp Body
- Nail / Pin

Manufacturing Process:

- Sheet metal forming
- Punching & bending
- Surface finishing

Material Grades:

- Mild Steel
- Stainless Steel

Surface Finishes:

- Zinc Plated
- Galvanised
- Custom coating

Testing & Inspection:

- Dimensional inspection
- Surface quality check

Applications:

- Electrical conduit fixing
- Plumbing installations
- Cable management
- Construction work

Installation Note:

Position clamp, insert nail, and hammer into base material for secure fit.

Packaging:

- Bulk cartons
- Retail packs
- Palletised loads
