

REVERSIBLE CHANNEL BRACKET

Short Description

Heavy-duty Reversible Channel Bracket designed for secure mounting and support of strut channels and structural components. Its reversible design allows flexible installation for multiple orientations in industrial, construction, and support system applications.

Product Overview

The Reversible Channel Bracket is a fabricated steel support component consisting of a base plate with pre-drilled holes and a welded channel section. It enables easy mounting to walls, ceilings, or structural frames while supporting channel systems. The reversible design allows the channel to be positioned as per installation requirements.

Quick Specifications

Material Options

- Carbon Steel
- Stainless Steel (AISI 304 / 316)
- Other grades on request

Surface Finish Options

- Zinc Plated
- Hot-Dip Galvanised
- Powder Coated
- Plain / Self Colour
- Custom coating available

Size Range

Available in multiple channel sizes and plate dimensions as per requirement.
Custom sizes available based on drawings.

Standards

Manufactured as per industry standards or customer-approved drawings.
Compliance documents available on request.

Customisation Availability

- Custom dimensions
- Thickness variation
- Special coatings
- Private-label packaging
- OEM manufacturing

Technical Specification Sheet

Product Description

Reversible mounting bracket with integrated channel support for structural and industrial applications.

Components

- Base Plate with holes
- Welded Channel Section

Manufacturing Process

- Cutting & fabrication
- Precision welding
- Surface finishing & coating

Material Grades

- Mild Steel
- Carbon Steel
- Stainless Steel

Surface Finishes

- Zinc Plated
- Hot-Dip Galvanised
- Powder Coated
- Custom finishes available

Dimensional Control

Manufactured within defined tolerances as per drawings or applicable standards.

Testing & Inspection

- Dimensional inspection
- Visual inspection
- Weld quality inspection
- Coating thickness check (if applicable)

Typical Applications

- Strut support systems
- Cable tray installations
- Pipe support structures
- Industrial frameworks
- Wall & ceiling mounting

Installation Note

Fix the base plate securely using appropriate fasteners. Mount the channel in desired orientation as per application. Ensure proper alignment and load distribution.

Export & Packaging

- Loose cartons
- Bulk packaging
- Palletised loads
- Custom branding available
